Table of Contents

Introduction ..... *v*

1. The Optics of Invertebrate Eyes
   Michael F. Land 1

2. Photoreceptor Sampling and Aliasing in Human Vision
   David R. Williams 15

3. Squeezed States of Light
   Malvin C. Teich and Bahaa E. A. Saleh 29

4. Free-Electron Lasers
   Charles A. Brau 53

5. Advances in Laser Resonator Design Using Variable-Reflectivity Mirrors
   A. E. Siegman 65

6. New Optical Glasses for the 1980s
   Tetsuro Izumitani 85

7. Unconventional Coatings
   H. Angus Macleod 121

8. Methods for Characterizing Surface Topography
   T. V. Vorburger 137
